

Hello all,

Below is a list of software that can be downloaded for free. Here are the instructions on how to download some of these software if you are not already aware. Please review the software that interest you.

Autodesk (all, including latest versions of):

AutoCAD

Revit

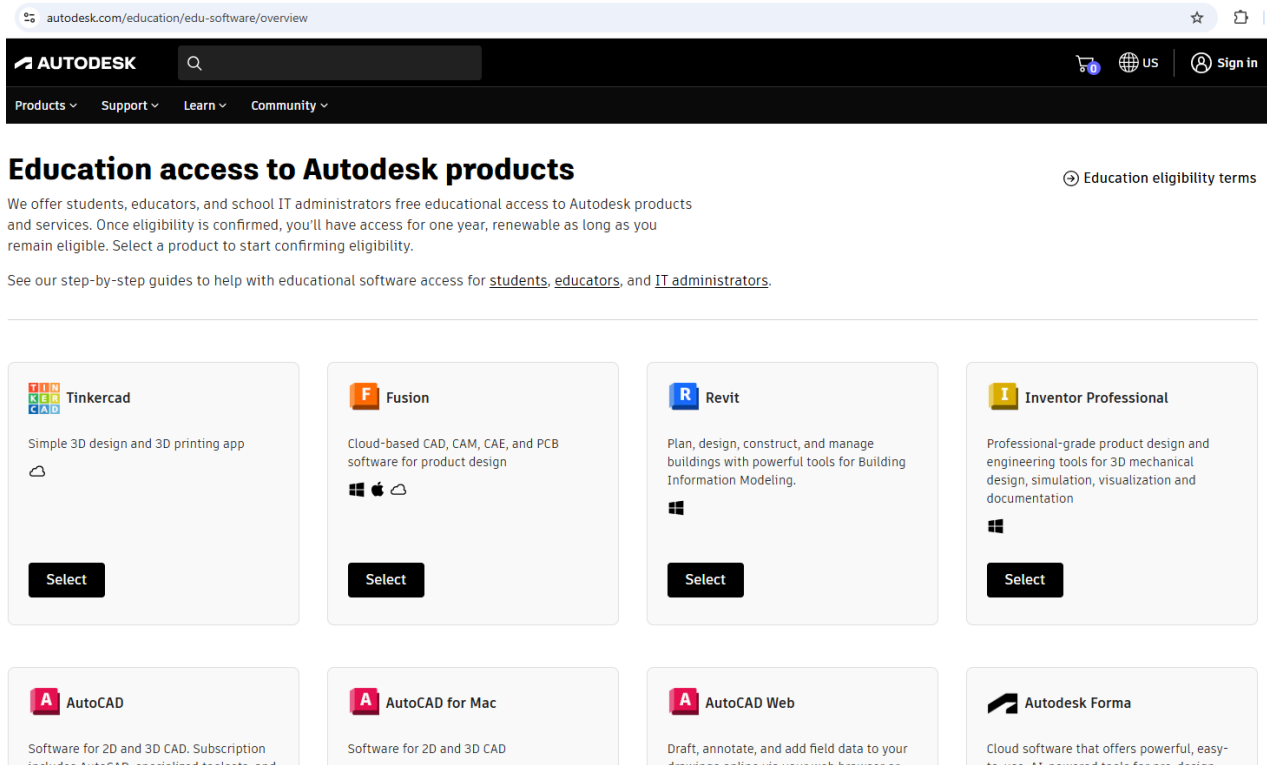

3dsMax

First, you must create a free account on the Autodesk website:

<https://www.autodesk.com/education/free-software/featured>

The screenshot shows the Autodesk website's navigation bar with the 'Sign in' button highlighted by a red arrow. Below the navigation bar, the page title is 'Education access to Autodesk products'. The main content area features a grid of product cards, each with a 'Select' button. The products listed are Tinkercad, Fusion, Revit, Inventor Professional, AutoCAD, AutoCAD for Mac, AutoCAD Web, and Autodesk Forma. A link for 'Education eligibility terms' is visible in the top right of the main content area.

You may use your NYSID email or personal email. Fill out all the info: full name, date of birth, school address, date of graduation, etc. (keep in mind that each year, you will have to renew your license and download the latest Autodesk product that you want to use).

Once you submit the form, it will send you a confirmation email to the email you created the account under. After you confirm, it will direct you to products, in which you can choose the application you want to download (it should be free, so make sure you are looking at the correct section).

After the installation, there will be three options to sign in, choose the one where you sign in with the email credentials that you created the account with. If you have any issues, please contact NYSID technology support at:
