For Zoom's updated version of their software that includes important security changes. Go to the Zoom Download Center to get the latest version (7.1.4).

In addition to other changes, there is now a Security icon in the host's meeting controls. When you host a meeting, you can easily remove a participant and turn on and off:

- A waiting room
- A lock on your meeting
- Screen Share
- Chat
- The ability for participants to rename themselves

To learn more about Zoom security, visit Privacy & Security for Zoom Video Communications or attend the Zoom webinars.
